FOR IMMEDIATE RELEASE

INDATA OFFERS NEW FACTSET DATA OPTIONS FOR iPM EPIC CLIENTS

Pricing, Analytics, Index, Security Master and other FactSet Data Available via Fully Automated and Configurable User Interface within iPM Epic Big Data Platform

Greenwich, CT – November 18, 2014 - INDATA®, a leading industry provider of software and services for buy-side firms including trade order management (OMS), compliance, portfolio accounting and front-to-back office delivered via iPM Epic® - the industry's first investment management platform specifically designed for the era of big data – today announced the availability of FactSet data for iPM Epic users.

A trusted data source and financial technology provider for over 35 years, FactSet (NYSE:FDS | Nasdaq: FDS) has partnered with INDATA to provide streaming exchange data, robust security reference data, and comprehensive benchmark content feeds to address the full spectrum of data requirements for OMS and portfolio management workflows. FactSet's data feed technology lets firms maintain and integrate data with speed and flexibility.

"Unlike the majority of our competitors who repackage third-party vendor data feeds into 'services' or provision downloads to individual data vendors, effectively double charging their clients for necessary and essential data, INDATA integrates data offerings from industry-leading vendors like FactSet directly into the iPM Epic software platform," commented David J. Csiki, Managing Director & President of INDATA. "The automation tools and flexible configuration options within Epic, combined with the quality data that FactSet is known for, provides a compelling solution for investment managers looking to gain efficiencies and effectively manage costs," he added.

"FactSet is proud to partner with INDATA to deliver our robust and high-quality content using our feed technology," said Todd Hartmann, Vice President, FactSet. "Delivering our content to industry-leading platforms such as iPM Epic highlights our mission to distribute the content and technology investment professionals require, while allowing them to better manage their data costs."
